

THE DOOR OF BEAUTY & INNOVATION

We choose a door for its aesthetic qualities, but doors offer so much more than aesthetics. Your front door is a warm familiar place where new guest arrive and a cheerful announcement when friends come. We live our lives through them. Our front door sees us when we start our day and are ready to take on new opportunities. It's also a gentle embrace at the end of the day, welcoming us to our home and family. Doors aren't just doors; they're a reflection of us and our home. They help us and our families feel safe and protected. We know how important it is to choose a door that best represents you, makes you feel secure, and fits your needs.

ABOUT PLASTPRO

Since 1994, Plastpro has always believed in providing a superior product with the best value, technology, and commitment to our customers. Our fiberglass doors offer the beauty and versatility of wood doors, but require less maintenance and have a longer lifespan. Wood and steel doors have been preferred in the industry, but both come with problems such as: rotting, rusting, and weather damage. Our fiberglass doors are the best solution and are not susceptible to weather damage, require less maintenance, and offer higher performance ratings. We've introduced the first door with composite stiles and rails, HydroShield technology, and composite Polyfiber (PF) Frames to the industry. Our doors feature a full length LVL block that provides stronger rigidity and a range of door locks and hardware to be installed for increased security. We carry a wide variety of designs, sizes, and styles that are bound to complement everyone's home.

Since the beginning, we've not only been committed to providing superior products, but also in creating opportunities. Our goal is to create positive changes for not only our employees and customers, but also for our community. We believe in doing good for the world and making a difference. For us, success is only as good as the good it creates. We've continuously partnered with Habitat for Humanity in order to create affordable, green houses for low-income families across the nation. We've donated more than 500 doors to various chapters of Habitat for Humanity and other non-profit organizations. When you buy a Plastpro door, you not only get a beautiful door with the best quality, you become part of Plastpro and join us in giving back to others.

PATENTED HYDROSHIELD™ TECHNOLOGY

Our exclusive HydroShield technology protects our doors against moisture and humidity infiltration, by creating a fully composite barrier that encases and protects the door on all six sides. It prevents warping, delamination, corrosion, rotting, and the buildup of mold and mildew. Our doors with HydroShield technology used with our Polyfiber (PF) Door Frames create an enhanced, impenetrable entryway.

1 FIBERGLASS REINFORCED DOOR SKINS

Our exclusive formula is measured precisely to ensure each skin is produced to the highest quality. With unlimited design options, customized panel configurations are possible. The skins require little maintenance and will not splinter, dent, warp, rot, or rust. They can be painted, stained, and we provide a variety of graining options.

2 FULL LENGTH COMPOSITE STILES

Our full-length composite stiles protect the door from external moisture to prevent warping or rotting. They have twice the screw-holding strength of wood.

3 COMPOSITE TOP & BOTTOM RAILS

High strength composite top and bottom rails prevent moisture from seeping into the door and stops the buildup of mold.

4 EXTENDED LOCKBLOCK

Plastpro's full length LVL allows any type of lock to be placed for increased security.

5 POLYURETHANE FOAM CORE

Our advanced CFC-free, high density, Polyurethane foam core enhances the door's soundproofing capabilities and provides insulation up to six times greater than wood doors.

BACKED BY WARRANTY

We are proud to offer one of the best warranties in the industry. Plastpro products are held to high standards. We stand behind our products and guarantee the best quality to meet your performance expectations.

PLASTPRO DOOR

- Full length composite top and bottom rails enhance the durability and performance of the door by preventing any water penetration, which eliminates the natural cracking found with wood.
- 2 High impact skin with beautiful old world craftsmanship will not split, dent, or rust.
- Full length composite stiles offer non-porous protection that prevents water from seeping into the door, which eliminates the natural cracking that occurs with wood.
- Full length LVL block provides stronger rigidity and a range of door locks and hardware to be installed on the door to increase security.
- Polyfiber (PF) Door Frame is durable, long-lasting, and enhances the quality and performance of the entryway when used with our door.

THEIR DOOR

- 1 Composite bottom rails with wood exposed on the bottom of door allowing for moisture penetration.
- 2 Shallow embossed skin resembling steel doors, reducing curb appeal.
- Limited length wood stiles allow moisture to enter creating future maintenance issues.
- 4 Average wood lock block of 12".
- Wood frame material will crack or rot over time.

The PLASTPRO DOOR met requirements for sawing, planing, routing, boring, drilling and chiseling. For more specific results, please see our website at www.plastproinc.com or contact our Customer Service Department at 1 (800) 779-0561.

TESTING RESULTS

PFTM DOOR FRAMES

To have a complete entry system, it is important to consider the material of the door frame. Wood doors and frames are prone to warping, rotting, and cracking, while steel doors and frames can rust and dent. You don't want to install a door that will fail, nor do you want to install a frame that will fail.

Plastpro's Polyfiber (PF) Door Frames are a uniquely formulated and innovative alternative to traditional door frames. They combine the beauty of wood but require less maintenance and have a longer lifespan. The material is durable, long-lasting, and is more thermally resistant than either wood or metal. The advanced system can be installed the same way as traditional wood frames with no added hassle. When used together with a fiberglass door, they create an enhanced, impenetrable entryway.

FEATURES & BENEFITS

- Equipped with HydroShield technology, it will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Frame is not able to be infested with termites at any point along the structure.
- Has twice the screw holding power of traditional wood door frames.
- More versatility in design. Available in various lengths and widths that can be stained as well as painted.
- Maintenance free and energy efficient.
- Continuous piece with no finger joint and is 25% more rigid than wood frames.

ARCH & RADIUS HEADER KITS

The shape of an arched and radius door isn't the only thing that makes it different from a traditional rectangular door. Arch doors exude style and give your entryway a brand new look. Plastpro is the only fiberglass door manufacturer able to offer full composite frames to match arch or radius top doors.

Plastpro Polyfiber (PF) Door Frames are produced with the highest quality and are available in a variety of graining options. For a detailed list of graining available per product, please refer to the chart below.

LIMITED

MODERN

Our Limited Series was specifically selected to showcase some of the richest, luxury graining available.

The Modern Series effortlessly makes a contemporary design simpler.

RUSTIC

Our Rustic Doors were designed to provide classic charm, while bringing traditional, upscale appeal to any home

MAHOGANY

The Mahogany Series brings a beloved wood texture into traditional, timeless styles.

FIR GRAIN

Our Fir Grain Series creates fine details and gives your home a traditional, craftsman appeal.

OAK GRAIN

Dressed in a rich oak grain texture, our Oak Grain Series gives a classic look to your home.

SMOOTH

TRUE WHITE OAK

The Smooth Series is made with a prepigmented white skin. Its simplicity gives a clean, minimal look to any of our fiberglass doors.

The True White Oak Series combines the best features from our Smooth and Oak Grain doors. Any home can enjoy a rich oak texture pattern in a pre-pigmented white skin.

ONELITE

Our Onelite Series features a fine, flush glazed glass with a removable stop to allow the glass to be switched without changing the entire door.

NOVA

The Nova Series was inspired by the gentle, rising light that causes a calm, peaceful feeling experienced in the early morning.

GLASS OVERVIEW

PAGES 16 - 27

A beautifully designed entryway helps set the stage for the rest of the home and creates a welcoming passage from public space to private abode. Nothing accomplishes that better than our exclusive glass designs that improve the look and value of your home while adding beauty to your everyday living.

Our doorlites are composed of a piece of decorative glass sealed between two pieces of tempered safety glasses, that provide excellent safety, sound, and thermal performance.

The state-of-the-art Warm Edge spacer system provides a seal that protects and insulates your door & home for years to come. Unlike the competition, our metal caming includes a gasket that cushions & protects the glass from chipping, cracking, and rattling during door movement.

DOORLITE

INSULATING SYSTEM

All Plastpro Decorative Doorlites are made with Super Spacer® Cushion Edge™, a flexible, U-shaped, silicone foam tape product used to wrap around and cushion our center decorative panel. Featuring a vapor barrier backing, the product used in combination with Hot Melt butyl, provides a superior Warm-Edge seal.

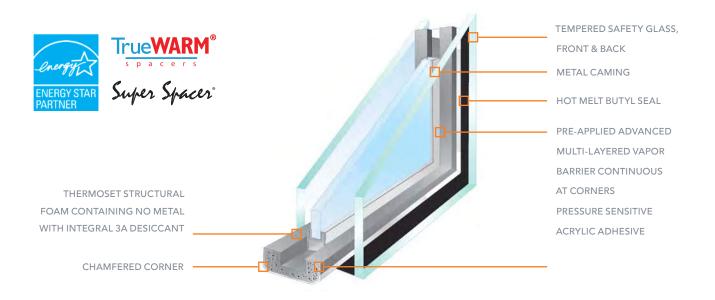

PERFORMANCE FEATURES

Warm-Edge Benefits: Superior silicone foam insulation, low thermal conductivity

Silicon Foam Features: Excellent UV resistance and extreme temperature performance

Dual-Seal Performance: Chamfered corners for increased sealant depth

Tempered Safety Glass for your peace of mind

^{*}This illustration applies to our triple pane glass only.

GLASS CAMING OPTIONS

Our exclusive glass designs are offered with different caming options to match a variety of hardware finishes.

GLASS FRAMES

BTHP™ SNAP-ON FRAMES

WROUGHT IRON

Our exclusive BTHP™ Snap-on Frames employ a series of specially designed clips that lock decorative glass firmly in place. Our BTHP™ Frames have no unsightly plugs or screws, and create a cleaner, more natural appearance in any entryway. Able to withstand temperatures over 200 degrees Fahrenheit, this frame is perfect for use in any door.

WROUGHT IRON FRAMES

This maintenance-free Wrought Iron doorlite frame resists rust and corrosion while working to keep cold out in the winter and heat out in the summer. Specially engineered to complement the range of cutouts in the Rustic Series, each frame is beautifully hand made and has a durable powder coat finish. May also be used in select Smooth Skin, Woodgrain, and True White Oak doors.

CAMELIA

CAMING: WROUGHT IRON TRANSOM: AVAILABLE

Camelia's wrought iron curves create symmetry, uniformity, and a sense of balance to a doors appearance. Against a waterfall textured background, the design gives the exterior of your home a modern and sophisticated charm, while delivering the ultimate level of privacy.

1 Wrought Iron

Waterfall Tempered Glass

FIRE RATED

ade with fire-resistant composite, Plastpro Fire Rated doors are extremely durable. Our doors are tested and comply with safety and performance standards to withstand fire for a minimum of 20 minutes. Certain models are available to hold off fire for 60 and 90 minutes. Most importantly, our doors provide a safe home without ever sacrificing style.

Contact us for stock availability.

TRIMMABLE

ur Trimmable Series is designed to fit in a variety of existing entry ways. Adjustments up to 2" in height and width can be made to the door through your contractor. Trimmable doors are available in Oak and Smooth skin. This is the door your home has been waiting for.

= Trimmable Option Available. Contact us for stock availability. (Only available in 3'0" width)

HVHZ IMPACT

Impact Doors are engineered to withstand the force of flying objects, while maintaining all the benefits and beauty of our door aesthetic. Our Impact Doors are created, tested, and certified to meet the most stringent wind and impact code requirements in the nation. Our innovative R&D Department has pioneered a unique patent-pending process whereby a missile-proof shield is built-in to reinforce the door.

= HVHZ Option Available. Contact us for stock availability.

RESIDENTIAL ADA

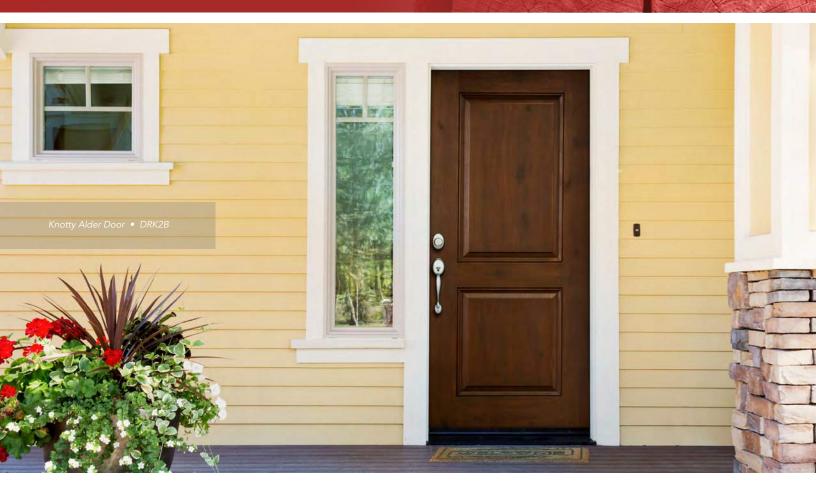

ur Residential ADA doors are offered in a variety of styles that fulfill all compliances. From Modern to True White Oak, our Residential ADA series has a 10" bottom rail that allows a kick plate to be installed. We have the option to include reinforced blocking through a special order.

= Residential ADA Option Available. Contact us for stock availability.

LIMITED SERIES

ur Limited Series was specifically selected to showcase some of the richest, luxury graining available. The Cherry, Knotty Alder, and Teak doors are fine, subtle, but detailed. Cherry is a premium American hardwood, prized for its natural luster and attractive grain. Knotty Alder is admired for its subtle swirls and rich grain pattern with sound knots. Teak is a worldwide favorite for it's beautiful straight, yet occasionally wavy or interlocked grain patterns. These grains exude an authentic wood grain and are so versatile they will complement any home.

SIMULATED DIVIDED LIGHTS "SDL" BARS

Plastpro Simulated Divided Lights (SDL Bars) can be used on the interior and exterior of our doors and help create personalized, unique looks. They are easy to install and will not rot or absorb moisture.

6 Lite

Sidelite

ACSDF/23004

FEATURES & BENEFITS

- Easy installation using common wood working tools and equipment.
- Will not rot or absorb moisture and resists the growth of fungus and mildew.
- Closed cellular structure prevents paint from peeling off the surface.
- Will not warp or crack when properly installed, or be affected by UV rays when properly coated.

4 Block Dentil Shelf

DENTIL SHELF

Plastpro Dentil Shelves are made of lightweight High Density Polyurethane (HDP) and will not warp, rot, or crack. HDP is an excellent alternative to traditional wood products.

FEATURES & BENEFITS

- Recreate Classic Design
- Create Custom Looks
- Affordable

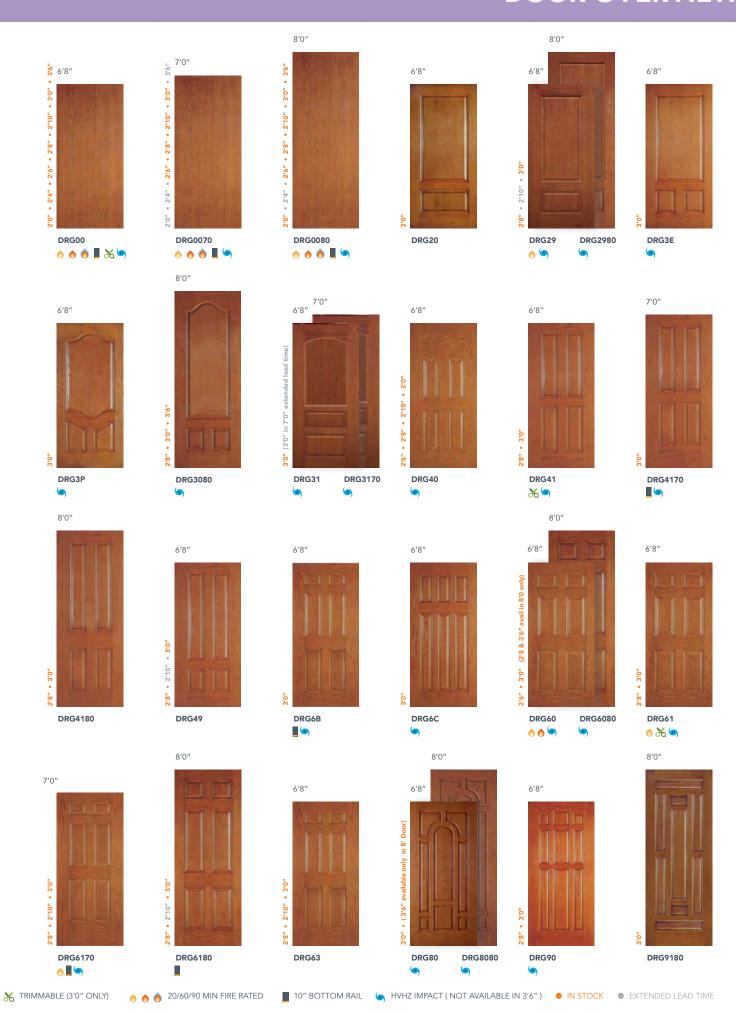

OAK GRAIN

ressed in a rich oak grain texture, our Oak series gives a classic look to your home. Oak doors come in many panel designs. Mix and match these styles with our entire glass line to find the combination that best brings out your homes unique characteristics. These doors create a timeless look that will never go out of style.

TRUE SIX PANEL NARROW DOOR

ONELITE

MAHOGANY GRAIN

ur Onelite Series features a fine, flush glazed glass with a removable stop to allow the glass to be switched without changing the entire door. Doors are available in Double-Insulated Tempered Glass, LowE, Grid Between Glass (GBG), or MiniBlinds.

171

This model complies with ADA standards and can accommodate ADA required hardware for easy operation. Reinforced blocking and closures allow the following flexible hardware to be installed: panic bars, reinforced arm closures, and exit rim devices. These devices are easy to grasp with one hand and don't require tight grasping or twisting to operate.

SIMULATED DIVIDED LIGHTS "SDL" BARS

Plastpro Simulated Divided Lights (SDL Bars) can be used on the interior and exterior of our doors and help create personalized, unique looks. They are easy to install and will not rot or absorb moisture.

Sidelite

FEATURES & BENEFITS

- Easy installation using common wood working tools and equipment.
- Will not rot or absorb moisture, and resists the growth of fungus and mildew.
- Closed cellular structure prevents paint from peeling from
- Will not warp or crack when properly installed, or be affected by UV rays when properly coated.

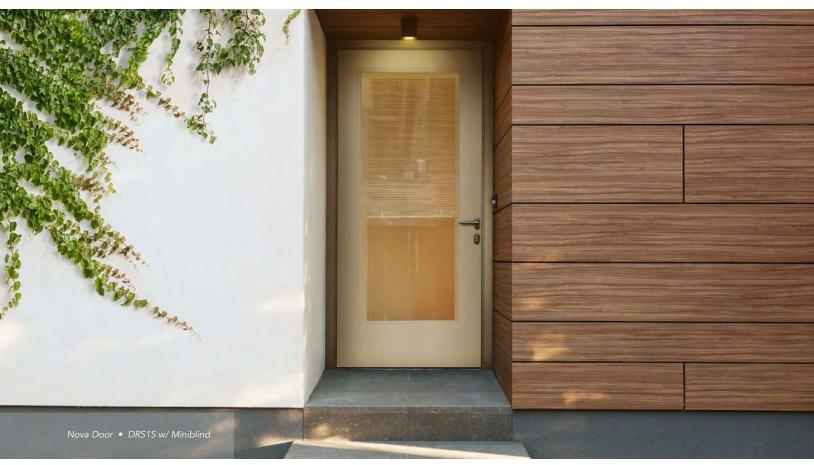

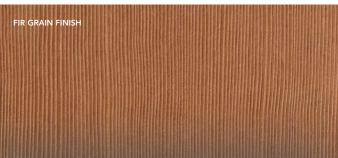

NOVA SERIES

SMOOTH FINISH

BRUSHED SMOOTH FINISH

he Nova series features glass that is directly glazed into the door to create a seamless blend between the glass and door. The large pane glass allows for the greatest views and amount of light into your home; brightening up the space and filling it with energy. Nova comes in two sticking profiles: craftsman and square. The series is available in both Smooth and Fir grain.

PRE-FINISHED STAIN KIT & STAINING GUIDES

Plastpro Prefinished Stain Kit is an easy way to stain your fiberglass door exactly how you want for you home.

We've created easy step-by step directions using our stain kit to make staining your door a breeze. These staining instructions were created for staining our oak, rustic, fir, cherry, and mahogany skin series.

Our kit is designed exclusively for Plastpro fiberglass entry doors.

PRE-FINISHED KIT

Plastpro Pre-finished Stain Kit contains everything you need to stain one prehung door and two sidelites, or one double door unit.

BENEFITS & ADVANTAGES

- Protects the door from the sun, UV rays, and harsh winter weather.
- Faster drying time with environmentally friendly water based top coat. Easy to apply
- Special formula with long lasting vibrant colors.

BOX CONTAINS

- Zar® Exterior Water-Based Polyurethane (qt)
- Zar® Wood Stain (pt)
- Mineral Spirits (4 oz.)
- Two 2" Foam Brushes
- One 2.5" Synthetic Bristle Brush

- Cheese Cloths
- Two Stir Sticks
- One Pair of Latex Gloves
- Door Staining Instructions
- Two Skin Samples

STAIN COLOR OPTIONS

The kit comes in seven different stain variations. Depending on your desired shade, you may need to apply the stain more than once for a darker finish. *Actual stain color may vary. To achieve the best results, test on the skin sample first.

Colors shown have one coat of stain.

MATERIALS NEEDED

PLASTPRO'S PRE-FINISH KIT OR:

- A. Pre-Mixed Stain (1/2 pint)
- B. Mineral Spirits (4 fl. oz.)
- C. Top Coat/Sealer (20 fl. oz.)
- D. Two Clean Cloth
- E. One Pair Protective Gloves

- F. 3" China Bristle Brush
- G. Two Stir Sticks
- H. Two Skin Samples
- I. Finishing Instruction

STAINING INSTRUCTIONS FOR GRAINED DOORS & PF™ DOOR FRAMES

STEP 1: SURFACE PREPARATION

- 1. Lay door horizontally on saw horses or a table.
- 2. Remove all the hardware and mask off anything you don't want stained such as the glass insert.
- 3. DO NOT SAND GRAINED FIBERGLASS / PF™ DOOR FRAMES
- 4. Wipe the Door / PF™ Door Frame with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain.

STEP 2: STAIN APPLICATION

- 1. Starting at the center of the Door / PF™ Door Frame, stain one to two panels at a time. Apply stain with a 3" to 4" soft bristle brush, or rag. Apply enough stain to fill the Door / PF™ Door Frame grain.
- 2. With a clean, lint free 24" x 24" cloth, softly wipe the surface until you reach your desired tone. TIP: When the rag becomes saturated with stain, refold to work with a less saturated section. Be sure to use the same rag for the whole Door / PF^{TM} Door Frame.
- 3. After all stain is brushed evenly, you may ad finishing touches by using a small 1" to 2" brush or cotton swabs.
- 4. (If desired) Allow the Door / PFTM Door Frame to dry for at least 48 hours before applying another coat. Then, repeat above process.

STEP 3: PROTECTIVE TOP COAT

Application of polyurethane top coat with UV inhibitors like ZAR[™] Exterior polyurethane, Wood Kote® Flagship UV, or Minwax® Fast Drying Polyurethane for exterior applications.

- 1. After stain has completely dried (48 hours), mix the top coat well and apply evenly using a clean dry 2" soft bristle brush or 3" foam brush. Be sure to stop when the grain changes direction.
- 2. Apply two or three coats of finish, allowing at least 24 hours of drying time between each application.

IMPORTANT TO NOTE:

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.
- Staining instructions are for Oil-Based, Premium Quality Wood Stains or similar product designed for use on a fiberglass surface. Please note the instructions indicated are specific to the Zar brand stain included in our stain kit. Please reference stain manufacturers instructions before applying any stain.

MATERIALS NEEDED

- A. Lint-free cloth
- B. Mineral Spirits
- C. Rubber gloves
- D. Masking tape

E. 4" Bristle Brush

F. For Water-based Application: Acrylic-based primer*/ acrylic latex-based exterior grade paint.

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR OAK GRAIN DOORS

STEP 1: SURFACE PREPARATION

- 1. Lay door horizontally on saw horses or a table.
- 2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert
- 3. DO NOT SAND GRAINED FIBERGLASS.

STEP 2: PAINTING

- 1. Apply exterior grade paint with 4" brush beginning with the panels.
- 2. It is common practice to paint both stiles the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
- 3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware should be finished inside of the lock bore as well.

CAUTION

- 1. Uhen using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro, Inc. makes no representations as to the proper use of other manufacturers' products.
- 2. When working with paints or solvents, make sure the working area is well ventilated.
- 3. Keep away from heat and flame as materials may be combustible.
- 4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
- 5. Keep out of reach of children.

IMPORTANT TO NOTE:

• It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

MATERIALS NEEDED

- A. Lint-free Cloth
- B. Mineral Spirits
- C. Rubber Gloves
- D. Masking Tape
- E. 4" Bristle Brush

F. For Water-based Application: Acrylic-based primer* / acrylic latex-based exterior grade paint.

G. Scotch Brite Pad (Fine) or 320-400 grit sandpaper

(For Smooth Doors Only)

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR DOORS & PF™ DOOR FRAMES

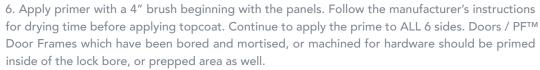

STEP 1: SURFACE PREPARATION

- 1. Lay door horizontally on saw horses or a table.
- 2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.
- 3. Smooth Doors only. Lightly scuff sand the surface with a Scotch Brite pad or fine sand paper. DO NOT SAND GRAINED FIBERGLASS.

7. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

- 1. Apply exterior grade paint with 4" brush beginning with the panels.
- 2. It is a common practice to paint both door stiles, or both PF™ Door Frame sides, the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
- 3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware should be finished inside of the lock bore as well.

CAUTION

- 1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro Inc. makes no representations as to the proper use of other manufacturers' products.
- 2. When working with paints or solvents, make sure the working area is well ventilated.
- 3. Keep away from heat and flame as materials may be combustible.
- 4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
- 5. Keep out of reach of children.

IMPORTANT TO NOTE:

• It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.
